

Classroom Support - Duplicating the PC display onto the Projector Screen

If you are trying to share the classroom PC display up onto the large projector screen, please try the following steps.

Press and hold the Windows Key , and press the P Key together.

A sidebar will appear on the right hand-side of your monitor screen, as below (let go of the Windows key).

To get the same image on both the Monitor and the Projection Screen you will need to click 'Duplicate' with the mouse, as below.

After a few seconds you should see a duplicate of the classroom PC display up on the large projector screen.

If after following these steps you are still unable to duplicate the display to meet your needs and, if it urgently impacts classroom teaching at City Campus or CLC during business hours (9 to 5), please call our critical response team using the number printed on the laminated sheet found on the classroom lectern/wall or displayed on the desktop background of the classroom PC.
