

How to access Adobe Creative Cloud software for personal use

Adobe for personal installation is available to all Staff “directly contracted” by Northumbria – unfortunately we’re not able to provide this for agency or external staff.

This Adobe software is available to both Windows and Mac users.

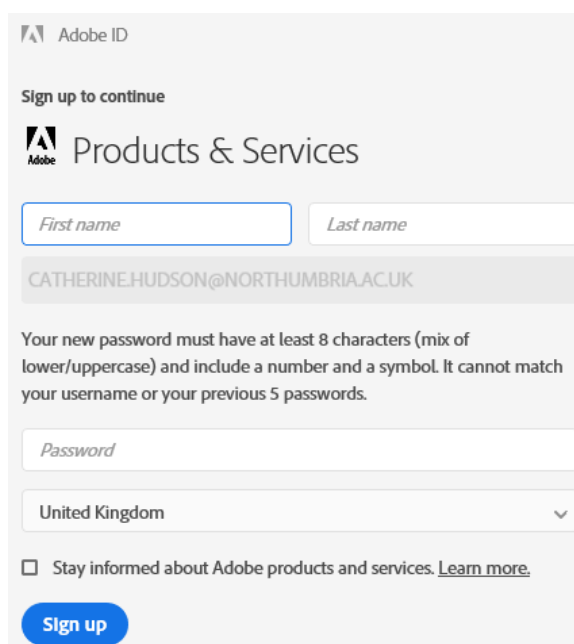

You’ll need an Adobe account and you should contact the IT Helpline who will be able to generate an account for you.

1. Setting up your account

- 1 Once the IT Helpline has generated your account, you’ll receive an email from **Adobe Systems Incorporated**.

It will contain a link to **Accept Invitation** and setup your account

- 2 Enter your First and Last Names and setup a Password for the account
- 3 Click **Sign Up**
- 4 A **Congratulations** box will appear to say you’re now setup, click **Launch Adobe.com**
- 5 Tick the box to accept the T&Cs then click **Continue** to access the Adobe Portal.

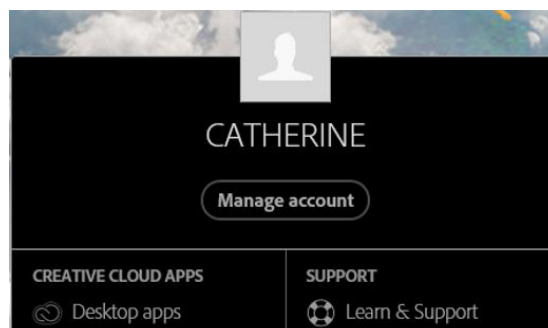

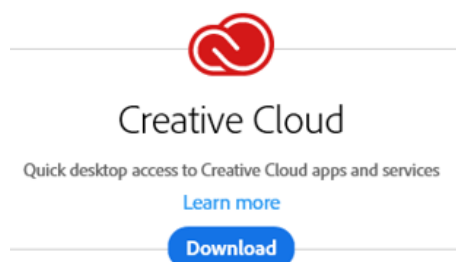

The screenshot shows the Adobe ID sign-up page. At the top, it says 'Adobe ID' and 'Sign up to continue'. Below this is the Adobe logo and the text 'Products & Services'. There are two input fields for 'First name' and 'Last name'. Below these is a grey box containing the email address 'CATHERINE.HUDSON@NORTHUMBRIA.AC.UK'. A message states: 'Your new password must have at least 8 characters (mix of lower/uppercase) and include a number and a symbol. It cannot match your username or your previous 5 passwords.' There is a 'Password' input field and a dropdown menu for 'United Kingdom'. At the bottom, there is a checkbox for 'Stay informed about Adobe products and services. [Learn more.](#)' and a blue 'Sign up' button.

2. Installing the Adobe Creative Cloud

Once in the portal you'll have access to lots of Adobe products to install. However, the recommended option from Adobe is that you install the **Creative Cloud App** which gives you access to further Adobe products inside.

- 1 From the black menu box (under your name), click **Desktop Apps**
- 2 Scroll to the bottom of the page and find the "Creative Cloud" option

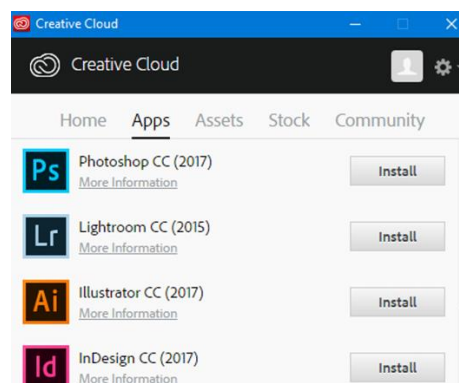

- 3 Click **Download**
- 4 Select the information when prompted and click **Continue**

- 5 You're now ready to install, click **Run** and wait while the **Adobe Installer** completes.

3. Using the Creative Cloud app

- 1 Once the Adobe Installer has completed a box will appear asking you to sign-in to your Adobe account
- 2 Once you've signed in, select the **Apps** tab and you can scroll through the software available
- 3 Click **Install** and follow the steps for your particular product.
