

MyAccess is the easiest way to get secure access to desktops, files, and specialist software, from wherever you are.

Connecting to MyAccess

1. Visit <https://myaccess.northumbria.ac.uk/>
2. Logon with your Northumbria Username and Password
3. Click **Launch Application** and MyAccess will open.

Didn't see Launch Application? MyAccess needs Citrix Receiver installed to open the 'full' version. See the steps below for the device you're using:

A. You're using your own device but have never installed Citrix Receiver:

- On the MyAccess logon page, click **Detect Receiver**
- Tick to agree with the **Licence Agreement** and click **Download**
- The Receiver will install for you, click **Continue**
- You will then see **Launch Application** to click and open MyAccess.

B. You're using a Northumbria Device and need Citrix Workspace from Software Center:

- Click the **Start** button in the bottom left-hand corner of your screen and type "Software"
- An entry for Software Center will appear in the list for you to click.

- Look for Citrix Workspace, click on the tile to open it and then click **Install**
- Once it has installed you can return to the MyAccess page and connect.

What to do if you can't install Citrix Receiver

1. If you're unable to download the Receiver you can click the option to **Use light version**
2. The light version of MyAccess gives you a reduced desktop and is suitable for quick access to your email, MyHR, and OneDrive.

Finding your way around MyAccess

MyAccess is split into two parts:

1. Apps gives you access to many software applications which you can launch on their own and without the need to have a full desktop open.

2. Desktops gives a full remote “Staff Desktop” just as if you were using a Northumbria computer. If you need to access multiple applications at the same time, we recommend you access the Staff Desktop.

1) Apps

Select the Apps tab at the top and you will see the software applications available to you. Click on the tile to launch the application – depending on its size it can take a little while to open fully.

You can access OneDrive through the application to save your work.

To close an application, click **File** and select either **Close** or **Exit**. Please don't close the application via the cross in the top corner.

2) Desktops

On the **Home** tab you'll see we've setup a shortcut for the Staff Desktop for you.

Click once on the icon to open it. The desktop will open and you can use the start menu and search to find what you need.

To close your desktop:

1. Click on the start icon in the bottom left-hand corner
2. Click on the 'person icon' and your name will appear
3. Select **Sign out**.

The other desktops available

There are two other types of desktop you'll see in the Desktops tab the other two are more student-focused but we know some Staff need to access these areas too:

1. **Open Access:** This gives you access to the large computer areas in the City and Coach Lane Libraries, Digital Commons, and the CCE Hubs.
2. **IT Lab:** This gives you access to the areas you will find on your timetable and the specialist software you need for your class. IT Labs shouldn't be used for software available in Open Access – we need to leave them available for teaching and specialist software access.

3) Search

Use the **Search** at the top right-hand corner to find specific software.

4) Favourites

Click the star icon on the 'locations' you use the most often to add them to your **Home** tab for quicker access next time.
